AIRSTAR

LED light pad

Building upon our innovative balloon lighting technology, Airstar has developed a powerful new LED lighting product that promises reduced power consumption and simple rigging. The unit's small profile allows it to easily fit indoor spaces with low ceiling heights and can be air-inflated and hung, or filled with helium and flown for maximum light output.

features

- > Full bi-color white temperature control
- > Dimmable intensity control
- > Flicker-free, soft diffusion
- > Reduced power consumption
- > Full wireless DMX control
- > Helium-inflated for easy to zero rigging

technical data

Light source	WW-CW LED
Maximum LED power	1,800W
CRI - color rendering index	> 97
Color temperature	2,800K - 6,000K
Average LED lifetime	> 50,000h
Efficiency (at 4,100 K)	80lm/W
Noise level	Silent
Flicker free	150KHz
Power supply	120 / 240V
Envelope size	350 x 350 x 130cm
Weight of the balloon	11kg
Diffusion angle	180°
Volume	14m ³
Flying height	7,m (indoor)
Setup-time	< 45min
